# MANIFESTATION

CONTRE LA HAUSSE DES LOYERS ET LE DÉMANTÈLEMENT DU DROIT DU BAIL!

POUR UNE VILLE POPULAIRE ET INCLUSIVE!

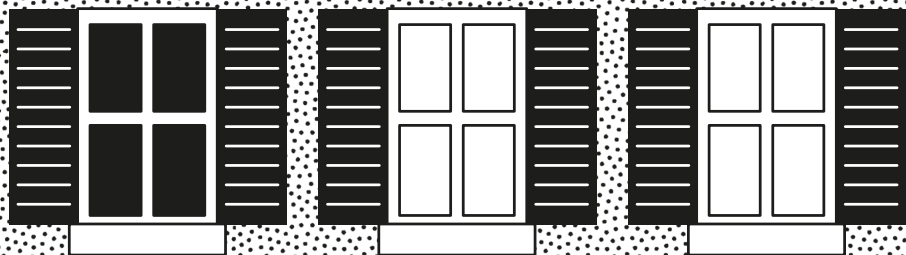

DÉPART : POSTE DU MONT-BLANC, 16H

# LOGEMENT POUR TOUXTES!

A major demonstration organized by RIPOSTES URBAINES will be held in Geneva  
Let's march on March 23rd !

## Against rising rents, Against the Dismantling of Tenant Rights For a popular and inclusive city, For Housing for all

Why demonstrate?

Major real estate companies and private landlords own people's homes. They generate profits from rental prices and increase them whenever possible, such as during changes in tenants.

*Let's hold accountable those who keep these laws in place and those who benefit from them!*

Landlords are speculating on empty commercial and office space! Even without tenants, these spaces are profitable for landlords. Buying a building today, keeping it empty, and reselling it tomorrow for a higher sum, means making a profit, even if there's no one to live in it and pay rent.

*The city should not be an object of speculation!*

Living somewhere, taking care of a house, investing in it, should give the right to stay there, more than a piece of paper or a property certificate. We claim the right of usage, rather than the right to ownership.

*Housing for those who live there! Support the collective organization of tenants and inhabitants against their landlords!*

Gentrification is the slow and insidious process of modifying a neighborhood and its inhabitants. It's the takeover of urban spaces by and for the rich. People living in precarious situations are forced to leave their neighborhood, which is becoming trendier, chic, and expensive. More surveillance, more cameras, sometimes more police or private security agents, in the name of the fight against insecurity...

*No urban struggles without class struggles!*

Mechanisms of domination in our society are directly translated into the city, amplifying and enabling them. The city reproduces these inequalities of race, class and gender by allocating space and its development to the pursuit of the interests of the most affluent social classes.

*For housing to be a right and not a commodity!*

*No person without housing, no housing without a person!*

*Let's bring together struggles in the city and in the streets!*
